**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 23, 24, 41, 42, 65, and 66 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 23, 24, 41, 42, 65, and 66 each recite the limitation "the cloth head" without sufficient antecedent basis for this limitation.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16, 18-20, 22-34, 36-38, 40-59, 61, and 63-67 are rejected under 35 U.S.C. 102(e) as being anticipated by Fu.

The Fu reference discloses a cleaning device/extendable wand comprising a cleaning fluid reservoir/bottle 14, a cleaning head 24, a cleaning fluid delivery

system/coiled tube 84, telescoping tubes 34 and 36, a pump 22, a handle 16, a sprayer 72, a mop head/cloth head 132, cloth retainers 142, a cloth 146, and an ice scraper 266.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17, 21, 35, 39, 60, and 62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fu in view of Schultz.

The Fu reference discloses a cleaning device as discussed supra, but does not disclose an adjustable sprayer knob which adjusts the spray pattern. However, the Schultz reference discloses a similar cleaning device wherein the sprayer includes an adjustable sprayer knob which adjusts the spray pattern to account for differences in the size of the area to be cleaned. It would have been obvious to employ an adjustable sprayer knob which adjusts the spray pattern on the Fu device in view of Schultz to account for differences in the size of the area to be cleaned.

### ***Conclusion***
